DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, are drawn to a method for regulating a menstrual cycle comprising administering a selective progesterone receptor modulator during a first dosing period and at least one progestogen during a second dosing period, classified in class 514, subclass 177.
- II. Claims 11-13, are drawn to a method of treating a gynaecological disorder comprising administering to a patient a SPRM for a first dosing period, wherein the improvement comprises administering at least one progestogen during a second dosing period, classified in class 514, subclass 177.
- III. Claims 14 and 15, are drawn to a kit comprising a SPRM and at least one progestogen, classified in class 514, subclass 177.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a materially different process of using that product. For

Art Unit: 1616

example, the kit in the instant claims comprising a SPRM and at least one progestogen can also comprise a SPRM and an estrogen.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are unrelated because one method is for regulating a menstrual cycle and the other method is for treating a gynaecological disorder. The methods have different effects thus the inventions are unrelated.

Notice of Possible Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not

Art Unit: 1616

commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

A telephone call was made to Paul Yasger on October 17, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Yasger is no longer the contact person for this case but stated that he would transfer the case to the appropriate person. The appropriate person has not made an oral election therefore this written action.
